Corporate Profile

Introduction

Thank you for the opportunity to provide you with information on our company. The information I have provided should give you a good perspective on both our company's depth and diversity. Davis & Adams Construction employs capable, dedicated and motivated individuals, ensuring that you and/or your client will be satisfied. The type of construction and management coordination that you will require, are exactly what Davis & Adams, and our team members excel in, each and every day. As you review our company's profile, please keep in mind that our goal is to help our clients succeed and that our main focus is teamwork, with both our clients and our subcontractors. Below are just a few key characteristics that we bring to the table with each and every project .

- Proactive Leadership throughout Projects
- Experienced Leadership in Commercial Projects
- Proficiency in the Design/Build & Design Management Procedure
- Commitment to Cost Effective Products with Quality Satisfaction
- Expertise in Corporate Office Design & Operations
- Commitment to a Teamwork Approach

Our familiarity with construction protocol and strong commitment to fiscal management make us an excellent candidate for your projects.

We strive to be a diverse company that fits your needs !

Sincerely,

Acie W. Davis
President
Davis & Adams Construction Inc.

About Us

Established in 1989, Davis & Adams Construction, Inc., is a General Contractor specializing in commercial tenant improvements, including interior/exterior remodels, build-outs, additions, and ground-up construction. Our experience includes Office, Retail, Hospitality, Mixed Use, Industrial, Laboratory, and Medical Projects.

Our Clients consist of both private sector and government entities. Projects range between daily service contracts to multi-million dollar ground-up endeavors. This flexible oriented service perspective earned Davis & Adams a position on San Diego Business Journal's top 25 Commercial Building Contractors list in San Diego County in 2007. Our Tenant Improvement Division ranks #6 in the SDBJ

Our staff of experienced professionals, includes 8 project managers, 15 field superintendents and a support staff of 7 administers projects. Estimating, scheduling, and invoicing are fully automated, enabling us to expedite bids and manage projects of any size or complexity. Your project management team will facilitate each project phase from design to completion, including value engineering, estimating, scheduling, sub-contractor management, jobsite supervision, troubleshooting and detail-oriented paperwork and reporting.

Clients whose projects require bonding receive full underwriting support from our surety company, First National Insurance Company of America. This augments our five million dollar comprehensive policy and one million dollar "errors and omissions" policy on our architectural services. Over the years, we have established a reputation for successful and timely project completion, quality workmanship, and excellent financial management.

The most current industry standards and technology are incorporated into each project we manage via valuable information obtained through industry sources. We are active members of The Associated Builders & Contractors, The Building Owners and Managers Association, The International Facility Management Association, The San Diego Chamber of Commerce, and The San Diego Better Business Bureau.

Construction Services

Pre-Construction

Davis & Adams will provide preliminary cost estimates for your project based on schematic, or conceptual drawings. The planning and design phases are important facets of a project. Without a strong planning foundation a project may run into a variety of unexpected stumbling blocks. Davis & Adams coordinates closely with the ownership group and the design team to determine the overall goals for the project with respect to user needs, quality, schedule and budget. During the planning process we identify the challenges of the project and offer solutions that fit with the overall goals established by the team. We then manage these goals to ensure a successful transition into the construction phase.

Budgeting & Estimating

Davis & Adams has a fully staffed Estimating Department which is available for hard bid projects, negotiated projects and conceptual budgeting, with a fast turn around time. Whether you need a budget to expedite a lease or have a fast track turn key project, we have full time estimators at your service. No commitment is necessary. We provide a detailed breakout for our estimates. We work together to ensure that the budget is reviewed and maintained throughout the course of your project.

Value Engineering

Provides the most value to the owner at the least possible expense. It also ensures that the architectural quality and intent of the building will not be lost during construction due to cost over runs. We can provide system analysis and offer alternatives in materials and methods to reduce costs.

Project Management

Each project we undertake, becomes the direct responsibility of a Project Manager. The assigned Project Manager will be involved with the job from the initial estimate to the day you move in. The Project Manager ensures a successful project, that will remain on schedule throughout, with a strong emphasis on quality. With every project, D&A puts our team to work, partnering our staff and hand chosen subcontractors, in order to meet your expectations. Each project will also have an on-site Supervisor who works directly with the Project Manager to ensure a timely completion with quality work in the field.

Design-Build

Davis & Adams Construction is a full-service, "one-stop" Construction Management/General Contracting firm from concept to completion. Davis & Adams Design Division is there to facilitate the entire project from a concept to a reality. Please ask us more about "Design Works"
